

## Structural engineering scavenger hunt – RULES

Teams of up to 4 people, participants under the age of 10 do not count towards team size limit.

Not all participants must be engineers, however we recommend at least one structural engineer per team.

Each entry can be submitted either in whole or as a picture with today's date stamp and at least one team member in the photo, unless otherwise noted.

Pictures must be submitted on either CD, a USB drive, or an SD card

No item/structure may be used to fill more than one category.

All team members must sign the waiver before participating. Minor's are the responsibility of their legal guardians.

Do not damage any structures or public property. No trespassing. SEI is not responsible for any legal trouble you get in.

Be careful. Do not climb where you shouldn't or stop on the side of a road if it's not safe to do so. SEI is not responsible if you get hurt.

Be creative.

Winner will be the team that finds the most items in the allotted time. Tie will be determined by fastest completion time, followed by random draw if necessary.

Things you may need:

Car – only 1, you must stay together and work as a team

Tape-measure / ruler – there are items on the list that must meet a certain size requirement. You must be able to prove size in your entry.
